*NOTE: Calibrate instruments at least every six months, if not more frequently, to maintain accuracy listed in the Bacharach Technical Characteristics section of the instrument's manual. The Fyrite Pro and Tech O2 sensors are calibrated to 100% N2 and 20.9% O2 in ambient air. The PCA, PCA-2, and ECA 450 O2 sensors are self-calibrating. All CO sensors are calibrated to 500ppm CO; CO-High to 4000ppm. The PCA, PCA-2, and ECA 450 CO (low) sensor is also calibrated to 1000ppm CO and 1000ppm H2 in Nitrogen.
